STUDENT AMBASSADOR

Cloud Computing (Azure) & Developer Tools

MM Salman Faris (Microsoft Learn Student Ambassador)

Event Agenda

1. Introduction
2. Git & GitHub
3. Azure
4. Deployment
5. Q&A

Git and GitHub

What is Azure?

Microsoft Azure is a cloud computing platform created by Microsoft.

Cloud Models

Datacenter & Regions

Azure Main Services

Azure VMs

Azure Container Instances

Azure VM Scale Sets

Azure Batch

Azure Service Fabric

Azure Kubernetes Service

Azure Functions

Virtual Network

Public
Subnet

Private
Subnet

Blob storage

Queue storage

Text layout (without bullet points)

Main topic: Segoe UI Semilight, size 28pt

Segoe UI, size 20pt for second level

Segoe UI, size 16pt for third level

Text layout with bulleted text

Main topic: Segoe UI Semilight, size 28pt

Segoe UI, size 20pt for second level

Segoe UI, size 16pt for third level

Text layout with bulleted text

Main topic: Segoe UI Semilight, size 28pt

 Segoe UI, size 20pt for second level

 Segoe UI, size 16pt for third level

Example with longer headline text wrapping to a second line

When the headline text is 2 lines, move this text block down to align to the lower blue guide 

If you don't see guidelines, click on the View menu, and then check the box in front of "Guides"

Use a "soft return" Shift + Enter to wrap text without adding extra line spacing

Adjusting list levels

Main topic: Segoe UI
Semilight, size 28pt

Segoe UI, size 20pt for second level

Segoe UI, size 16pt for third level

Use the “**Decrease List Level**” and “**Increase List Level**” tools on the **Home** menu to change text levels.

Try this:

1. Place your cursor in the line of text that says “Segoe UI, size 20pt for second level”
2. Next click the Home tab, and then on the “**Decrease List level**” tool. Notice how the line moves up one level.
3. Now try placing your cursor in one of the top “Main topic...” line of text. Click the “**Increase List Level**” tool and see how the text is pushed in one level.

Use these 2 tools to adjust your text levels as you work

Bullet points layout with subtitle

Set the subtitle to 20pt in the same text block, with character spacing Normal

Move the text block down vertically to align to lower guide[↑]

If you don't see guidelines, click on the View menu,
and then check the box in front of "Guides"

Slide palette info

The PowerPoint palette for this template has been built for you and is shown below.
Avoid using too many colors in your presentation.

PowerPoint Theme Accent colors

Use **Accent 1** and **Accent 2** as the main accent colors.

Use **Accent 3** and **Accent 4** when additional colors are needed.

Use **Accents 5-6** sparingly

Creating accessible content

Take the following steps to create accessible content that everyone can consume effectively.

Contrast

Use high contrast colors for maximum readability

The recommended contrast ratio is at least 4.5:1

Color Contrast Analyzer

Download this tool to determine the legibility of text and the contrast of visual elements

Shape and color

Use different shapes with a legend to indicate statuses to accommodate for color blindness

Example:

Subject 1	●	
Subject 2	▲	
Subject 3	✖	
● C1	▲ C2	✖ C3

Alt text

Alt text helps people with screen readers understand the content of slides

You can create alternative text for shapes, pictures, charts, tables, SmartArt graphics, or other objects

Here's how:

Right click the image or shape
Select Edit Alt Text

Enter a Title and Description of your image or object

Slide layouts

Using a built-in slide layout that matches your content ensures a hierarchical reading order of text blocks

Example:

If a new slide will have a title, rather than starting with a blank layout and adding a text block for the title, choose one of the built-in layouts with a title

Reading order

Screen readers describe content on the screen in the order it was created

To ensure your content is read back in the order you prefer, arrange your objects in the Selection Pane appropriately. Objects on the bottom of the selection pane are read first

Here's how:

Click the Home tab
In the Drawing group, select the Arrange drop-down menu
Click Selection Pane...

Additional tips

Be sure to run the **Accessibility Checker**! Go to **File** → click the **Check for Issues** drop down menu → click **Check Accessibility**

Videos need to be accessible: If your presentation includes a video, ensure it is captioned and audio described (if appropriate)

Visit the [Office Accessibility Center](#) to learn more about accessibility in PowerPoint

Software code slide

This slide layout uses Consolas, a monotype font which is ideal for showing software code.
